

ABOUT

SafeView Ride PC is a flexible edge mounted shield system for added personal protection to create a safer working environment.

Designed for use in public and commercial spaces such as retail, offices, airports, healthcare, and schools. The system can be easily mounted on the edge of any counter or workstation and is designed with up to 1-1/2" clearance along the back edge to accommodate other edge mounted hardware and cables. Various panel types are available to customize work areas for added privacy and functionality.

SafeView Ride PC comes in standard and custom sizes to meet your project needs.
