

ABOUT

SafeView Stak is a flexible workspace partition and shield system for added personal protection to create a safer working environment.

Designed for use in public and commercial spaces such as retail, offices, airports, healthcare, and schools. The system can be easily installed in between open desk workspaces with adjustable leveling and fastening hardware. Various panel types are available to customize work areas for added privacy and functionality.

SafeView Stak comes in standard and custom sizes to meet your project needs.
