

## ABOUT

SafeView Travel LT is a mobile personal shield system that is designed to be conveniently stowed and easily deployed for a safer working environment.

Designed for use in public and commercial spaces such as retail, offices, airports, healthcare, and schools. This shield can be taken anywhere to provide an additional level of protection for in-person interactions. The shatter-proof polycarbonate construction is highly durable and non-flammable compared to other acrylic shields. The magnetic catch allows for easy and secure stowing, while integrated pass through allows for the exchange of documents and small items without compromise.

SafeView Travel LT comes in a convenient standard size, though custom sizes are available.
