

ABOUT

SafeView Work is a flexible shield system that adapts to existing workstation partitions for added personal protection for a safer working environment while adding functionality and privacy.

Designed for use in public and commercial spaces such as retail, offices, airports, healthcare, and schools. Each panel is fastened using a custom bracket system that can adapt to almost any existing workstation furniture.

SafeView Work comes in standard and custom sizes. Most solutions are custom based on your workstation requirements, please inquire with our sales staff for a solution that meets your project needs.
